## 14TH INTERNATIONAL CONFERENCE ON RENEWABLE MOBILITY

23/24 January 2017 | Berlin

Ladies and gentlemen,

being the highlight event for the European biofuel industry, the international conference “Fuels of the Future” at the same time serves as an important forum for discussing European and international politics on biofuels and renewable mobility. The conference involves all relevant players on the market and aims at addressing the specific needs of the industry.

In January 2016, again more than 500 participants are expected to attend, among them representatives of the primary materials production industry and of logistics, of the mineral oil industry, of automotive engineering and the automotive industry, biofuel producers, auditors and environmental experts, as well as representatives from politics, certification systems, science and research.

To interested companies and associations the conference offers effective exhibition and cooperation possibilities which have the following targets:

- Position your company at the biggest gathering of the biofuel sector in Europe
- Profit from a strong political, scientific, economic and media presence in the German capital
- Enlarge your network through high quality international contacts
- Present your products and services and gain new orders.

The conference provides a compact programme including lectures on current developments in the sector, on the economic and legal frameworks, on primary materials and potentials on international markets and on biofuels in the aviation industry. Furthermore, in 2017 the focus will be on

- Certification systems worldwide and the link to a bioeconomy
- Prospect on the established biofuels on the market until 2020 and beyond
- 2nd and 3rd generation fuels
- bio-methane in the transport sector
- E-mobility

You are cordially invited to attend the “Fuels of the Future 2017” conference. You will have the opportunity to get more detailed information on the specified topics and to get into discussion with representatives from business, German and EU politics and science.

The objective of our expert conference is to provide a well-founded platform to the several development paths of alternative fuels and alternative drive technologies and to promote contacts and networking for our business clients.

Sincerely yours,

Artur Auernhammer, MP  
Chairman of the German BioEnergy Association (BBE)

## 14TH INTERNATIONAL CONFERENCE ON RENEWABLE MOBILITY

23/24 January 2017 | Berlin

### **Venue:**

CityCube Berlin (opened May 2014), South Entrance of the Berlin Exhibition Grounds, Messedamm/corner of Jafféstraße <http://www.citycube-berlin.de/>

### **Date:**

23/24 January 2017

### **Organisers:**

BBE – German Bioenergy Association  
UFOP – Union zur Förderung von Oel- und Proteinpflanzen e. V.  
BDBe – Bundesverband der deutschen Bioethanolwirtschaft e. V.  
VDB – Verband der deutschen Biokraftstoffindustrie e. V.  
FvB – Fachverband Biogas e. V.

### **Project management and organisation:**

Office of the German Bioenergy Association  
Markus Hartmann  
Godesberger Allee 142–148  
D-53175 Bonn  
Tel. 0228 81 00222  
Fax 0228 81 00258  
Email: [hartmann@bioenergie.de](mailto:hartmann@bioenergie.de)

## **Opportunities for exposition and participation:**

Companies and organisations interested in promoting their engagement efficiently to a public and targeted audience are offered to support the conference as a partner and thereby present their company. Sponsors can benefit in the following ways:

- Initiate new business contacts.
- Improve information on and acceptance of your products.
- Present progressiveness and technical know-how.
- Create a positive image as an ecology-minded and responsible company.
- Generate the perception of a leadership position on the biofuel market.
- Corporate advertising reaches out to a wide target group due to the presence of a large specialised audience and specialised press.
- Exclusive advertisement in direct mailings via inclusion of your logo in the programme flyer, the proceedings and on the Internet.

## 14TH INTERNATIONAL CONFERENCE ON RENEWABLE MOBILITY
